

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Virgin Money Growth Fund 2

Income Units: ISIN GB00BR4R5J95 GBP

This fund is managed by Virgin Money Unit Trust Managers Limited. You can reach us at Jubilee House, Gosforth, Newcastle upon Tyne NE3 4PL.

Objective and Investment Policy

The aim of the fund is to provide a total return (income and capital growth) over the longer term (five years or more) by investing in shares and bonds from around the world. The fund is the middle risk fund in the Virgin Money Growth range, which offers three funds with different levels of risk and potential return.

The fund aims to meet the objective by investing in other funds, rather than investing directly in individual shares and bonds. This means that the fund is what's often known as a 'fund-of-funds'.

The fund invests:

- At least 60% in funds that have a higher return potential (compared to other investments in the fund) – but which carry a higher level of risk, such as shares (from both developed and emerging countries) and higher yielding bonds (such as corporate bonds rated by the leading credit agencies as below investment grade – BB or lower).
- The rest in funds that have a lower return potential (compared to other investments in the fund) – but which carry a lower level of risk such as bonds with strong credit ratings (for example, developed government and investment grade corporate bonds with relatively strong credit ratings – BBB or higher) and cash.

The split between higher and lower risk investments and the types of investment (for example geography and types of bonds), are chosen so that risk, (measured by how much the fund's value fluctuates, known as 'volatility') is expected to remain within the range of 60% to 80% of the risk of world stock markets over 10 year periods. The fund uses the MSCI All Countries World Index GBP to represent world stock markets.

The underlying funds are chosen to implement the desired mix of assets as per the bullet points above. Normally at least 80% of the funds that the fund invests in will be passively managed. This means that they aim to track the performance of a particular share index or bond index. The rest will be actively managed funds – this is where the fund manager chooses individual shares/bonds and as a result returns may be higher (or lower) than the market.

One way in which the fund seeks to manage risks and opportunities is through Environmental, Social and Governance (ESG) considerations.

Where the Investment Adviser feels it is beneficial from a risk and return perspective and suitable opportunities are available, investments will be chosen because of their ESG credentials sustainable investing practices, and or supporting the transition to a lower carbon economy. Also the fund will limit (to no more than 0.5% of the value of the fund) indirect exposure to companies which

- make more than 5% of their earnings from tobacco, thermal coal or unconventional oil and gas (such as oil sands or shale gas)
- are involved in the manufacture of controversial weapons such as cluster munitions
- or who violate the UN Global Compact principles on humanrights, labour, the environment and anti-corruption.

The fund's mix of investments will be reviewed at least annually, and may change in consideration of the outlook for each investment type. But it will always include at least 60% in funds with higher risk/return potential.

The fund doesn't use a benchmark as a guide for investing or as a target to beat. But we do use a performance comparator which investors may want to compare the fund's performance against. This comprises 60% shares and 40% bonds. Shares are represented by the MSCI All Countries World Index GBP, whilst bonds are represented by the Bloomberg Global Aggregate Bond Index – GBP Hedged.

Designed for investors who want to:

- Grow their money over the longer term (five years or more).
- Balance the level of risk and reward by investing in a fund that spreads their money across shares and bonds.
- Understand the likely risk of the fund they invest in compared to investing in shares (by virtue of the expected volatility range as per the Investment Policy).

Income earned by the Fund can be taken twice per year or reinvested into additional units. You can buy and sell units on any business day.

Please be aware this fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and Reward Profile

When it comes to investing, potential return and risk are linked. Over the longer term, investors who are prepared to accept greater risk can typically look forward to greater returns.

The risk indicator above shows the fund's risk and reward profile based on how much the investment types the fund invests in have moved up and down in the past.

Risk level 1 means a low (but not zero) risk of losing money but typically offers limited potential rewards. Risk level 7 means the risk of losing money is much higher, but the potential rewards can be much greater.

The Virgin Money Growth Fund 2 doesn't mean that it has a Risk Level 2. It is in category 5 because it invests in both higher and lower risk investments, seeking a balance between risk and reward. The risk category isn't a target or guarantee, and can change over time, but it may help you decide if a fund satisfies your appetite for risk and return.

Beyond the general risk of investing reflected in the rating shown on the previous page, there are a few specific risks most relevant to this fund:

Credit Risk – The issuer of a bond might not be able to keep up interest payments or pay the full value when the bond matures. This risk is most relevant to the corporate bonds within the fund, notably higher yielding bonds (where credit ratings are lower and the risk of non-payment is greater).

Currency risk – Some of the investments in this fund will be in currencies other than the British Pound, so changes in exchange rates may impact the value of your investment.

Emerging markets risk – Investing in stocks (bonds and or shares) issued by companies and governments from countries outside of the major developed markets involves greater risk. Less developed markets, or 'emerging markets', may have fewer controls, weaker market frameworks and suffer from political changes which can devalue an investment.

Liquidity risk – When markets are experiencing difficulties, the fund may need to sell assets at a price lower than their 'market value'. This is often caused by a lack of buyers – notably for bonds with lower credit ratings – which could result in the fund losing value.

Charges for this Fund

There are charges associated with managing the fund.

The "Ongoing Charge" (shown to the right) is deducted directly from the unit price and paid to us, so it will reduce the return you receive.

There will also be transaction costs for the buying and selling of shares and bonds. These costs vary over the course of the year in line with market conditions and how much trading the fund does. They are also accounted for in the unit price, so the return/change in value you see is after these have been deducted.

We do not charge an entry or exit charge when you buy or sell units in the fund.

For more information about charges including when we may apply a 'Dilution Levy' such as on large deals, and estimated costs, please refer to the Fees and Expenses section of the Fund's Prospectus and also the annual report and accounts which will include detail on the exact charges made over the previous financial year. This is available from our website – virginmoney.com/myinvestments.

One-off charges taken before or after you invest

Entry Charge	0%
Exit Charge	0%

That's the max – we won't charge you any more before your investment starts or after it ends.

Charges taken from the fund over a year

Ongoing Charge	0.75%
----------------	-------

Charges taken from the fund under specific conditions

Performance Fee	0%

Past Performance

■ Virgin Money Growth Fund 2 (see reference to the right)
■ Benchmark/Performance Comparator (see explanation to the right)

Past performance is not a reliable indicator of future results.

The fund was launched in February 2015 as the Virgin Bond, Gilt, UK and Overseas Share Fund, with a different investment strategy and benchmark compared to now. The performance shown to the left relates to the previous strategy and benchmark for years preceding 2021, and for 2021 it is a combination of performance realised under the old strategy and benchmark (until 15 October 2021) and the new strategy and performance comparator thereafter.

You can see an indication of how the new strategy would have performed in previous years on virginmoney.com.

Past performance is calculated in GBP and represents the percentage change in the unit price, with an assumption of income reinvested into additional units following each distribution.

Source: Lipper, bid to bid with net income reinvested.

Practical Information

Trustee:

It's Citibank UK Limited.

Tax legislation:

This fund is subject to the tax legislation of the United Kingdom, which may have an impact on each investor's personal tax position. If you're unsure what that means for you, we suggest you run it past a Financial Adviser. You could also ask them how it might affect you if the Government changes the rules on tax relief for investors or funds. If you are looking for advice, you can search unbiased.co.uk for an Independent Financial Adviser (IFA) near you.

How we're paid – in detail (Remuneration):

You can check out our UCITS V Remuneration Policy, including

details of our Remuneration Committee at virginmoney.com/remuneration.

If you'd prefer it on paper, just ask us for a free copy.

More information:

Go to virginmoney.com/myinvestments for fund information or our prospectus, as well as the current unit price and latest financial report and accounts, all free of charge.

Liability:

Virgin Money may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the fund.
