

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Virgin Climate Change Fund GBP

Accumulation Units: (ISIN GB00B29KGH36)

This Fund is managed by Virgin Money Unit Trust Managers Limited, Jubilee House, Gosforth, Newcastle upon Tyne NE3 4PL.

Objective and Investment Policy

The objective of the Fund is to provide capital growth. The Fund invests mainly in shares of European companies which benefit from pursuing environmentally-aware capitalism.

It may also invest in:

- > shares of non-European companies.
- > other securities permitted by UCITS regulations.
- > derivatives, to reduce risk or costs.

Designed for investors who:

- > are comfortable investing in actively-managed investments.
- > want to grow their money by potentially more than a stock market average.
- > want to invest in a range of mainly European companies that are delivering improved environmental performance.

Any income the Fund generates, after ongoing charges are paid, will be reinvested to grow the value of your investment. This is automatically reflected in the value of your units. You can buy and sell units on any business day. Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

On the financial markets, rates of return are typically linked to risk. Over the longer term, investors who are prepared to accept greater risk can typically look forward to higher returns. The risk indicator above shows the Fund's risk and reward profile. Risk level 1 signals a low risk of losing money but typically offers limited potential rewards. At risk level 7, the risk of losing money is much higher, but the potential rewards are typically much greater. Note that even investments in the lowest risk category are not entirely free of risk.

The risk indicator is based on the rate at which the value of the Fund has moved up and down in the past. Note that past figures may not be a reliable indication for the future.

The risk category shown is not a target or guarantee and may move over time.

The Fund is in category 5 because it invests in company shares.

These typically provide higher rewards but carry a higher level of risk than other investments such as gilt-edged securities.

Governments can change the tax relief available to individuals and funds.

Market risk: share, bond and gilt prices may go up and down.

Credit risk: once the Manager has paid for shares, bonds and gilts the individual or organisation the Manager bought them from could fail to hand them over.

Performance risk: the Fund may not deliver its stated investment objective.

Foreign exchange risk: as this Fund invests outside the UK, the value of your investments may be affected by changes in currency exchange rates.

The Manager aims to control these risks, however, if they do materialise the value of your investment could go down.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The Ongoing Charge is based on expenses for the six-month period ending 31 March 2018. The figure may vary from year to year. It excludes portfolio transaction costs, except when the Fund buys or sells units in another collective investment fund and an Entry/Exit Charge could be paid.

The Manager may also charge a Dilution Levy on the purchase or sale of units by an investor. The Dilution Levy protects remaining investors against the costs incurred by the Fund in purchasing or selling a large number of units.

A Dilution Levy may be imposed:

- > where the Fund size is in continual decline.
- > on 'large deals' i.e. a purchase or a redemption of £250,000 or more.
- > any case where the Manager is of the opinion it is in the interests of remaining Unitholders.

The estimated cost of a Dilution Levy would be:

- > 0.45% of the purchase cost of units by an investor.
- > 0.15% of the sale proceeds on a sale of units by an investor.

For more information about charges, please refer to the Fees and Expenses section of the Fund's Prospectus which is available by calling us on **03456 10 20 30**.*

One-off charges taken before or after you invest

Entry Charge	0%
Exit Charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing Charge	1.30%
----------------	-------

Charges taken from the fund under specific conditions

Performance Fee	0%
-----------------	----

Past Performance

Past performance is not a reliable indicator of future results.

The Fund was launched in January 2008 and the unit class in January 2008.

Past performance is calculated in GBP and is expressed as a percentage change of the Fund's Net Asset Value at each year end.
